### About KSC Boxes :

KSC is a market leader in cable management systems since 1978, to integrate cable management portfolio, KSC introduced KSC Back Boxes.

KSC back box is galvanized steel box with/without cover suitable for containing one or more electrical device it can be recessed or inserted in a wall or ceiling.

KSC Boxes indelibly marked with the following particulars:

- British Standard BS 4662.
- KSC logo trademark.
- Earth link mark.

KSC boxes are made of folded GI steel of thickness starting from 0.9 to 1.1mm upon request, it have tied sides at the corners to ensure adequate strength to resist mechanical damage and the service conditions specified.

KSC Boxes equipped with the following :

- 1) Ears with 3.5mm tapped holes to facilitate devices installation with 3.5mm screws.
- 2) 6mm diameter base holes for securing surface mounting.
- 3) knockouts for the reception of conduit with nominal conduit size 20/25 mm and has a tolerance of  $\pm 0.50$  mm. KSC boxes knockouts are located so that locknuts or bushes can be clamped in position satisfactorily against the walls of the box.
- 4) Earthing terminal for the purpose of safety upon request.
- 5) Adjustable Lugs for the purpose of electrical utility alignment.

### Product Features:

#### Design Criteria/Standards:

KSC follow the international standards with its boxes to insure the full compatibility with international standard wiring device or electrical utility.

## Safety:

### Earthing Terminal

Earthing terminal is made of pure brass to insure full protection for both devices and human life. It could receive 4mm<sup>2</sup> wire connected to the mother earth, positioned so as not to encroach on the minimum free space requirement of the box (at the bottom).

### Earthing hole

All KSC Boxes are provided with earthing hole ready " by default" for any special connections in case of earthing link not requested .

### Corrosion resistant

All KSC boxes are made of high anti corrosion/rust galvanized steel, and appropriately protected against rust and corrosion by HDGBF finishing being applied to both inside and outside of boxes, surface treatment is complying to the following Specs:-

- BS 2989
- ASTM-A653. Grade 90 (275 grams / m<sup>2</sup>)
- SASO GSO BS 4662/2008
- SASO GSO IEC 60670-1/2012
- SASO GSO IEC 0670-22/2007
- UL standard (UL-797)
- SASO 2945:2020

### Rigidity Strength against Mechanical stresses

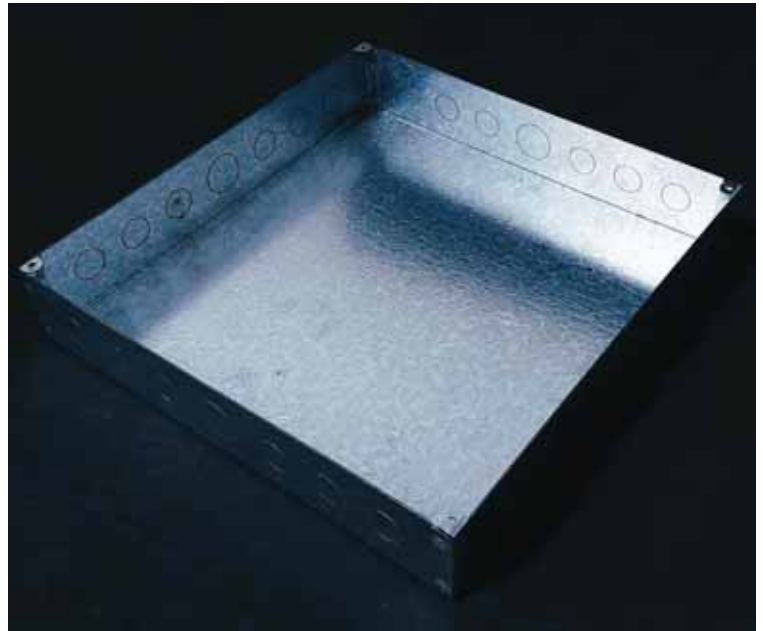

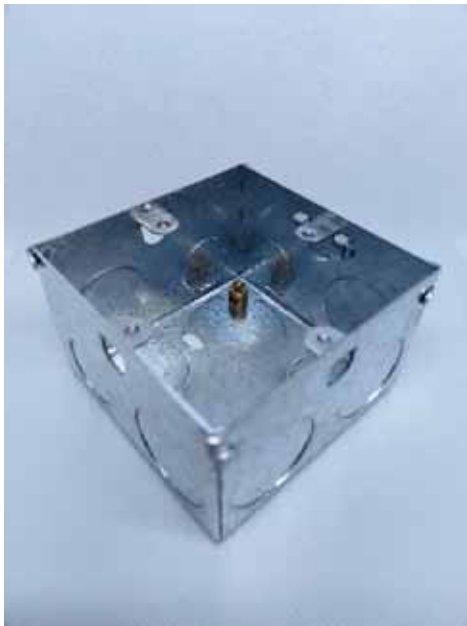

KSC boxes made of high strength steel insuring long life reliability

### Conduits Knockouts

KSC boxes are fitted with multi-radii conduits knockouts, these knockouts are no-hassle removable without extra efforts but withstanding the regular installation forces as well .

The knockout can sustain a gradually applied load equivalent to a weight of 4.5 kg, applied at right angles to any point upon its surface by a mandrel with a 6 mm diameter flat end.

### Fixed/Adjustable lug

KSC switch boxes fitted with Fixed and adjustable lugs which are handy-helpful in aligning installed electrical utilities providing right and desired positioning.

The lugs/adjustable lug made within KSC box are tapped for screws M3.5, the adjustable lug is an accessory fixing lug with provision for movement for the purpose of aligning the electrical utility with a minimum torque of 0.4 Nm.

### Quality Control

KSC is proud of our quality assurance, every small particular detail of our products is studied and tested by our in-house and 3rd party labs giving our customers the maximum possible guarantee as usual.

To reach that quality level we are pushing our product to its extreme during everyday and type tests performed as per the international standards.

Certificates:

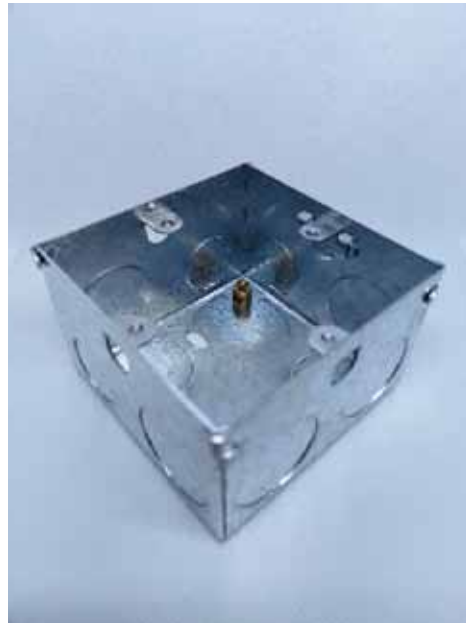

Boxes Specifications:

Item	Description
Standard	SASO 2945:2020 and BS4662.
Rated Voltage	110/440 VAC
Rated Frequency	50/60 Htz
Material/Finishing	Hot-Dipped Galvanized Steel Sheet
Wall Thickness	0.9 – 1.1 mm
K/oust Size Ø	20.5 & 26.5 mm

### Conduits Knockouts

KSC boxes are fitted with multi-radii conduits knockouts, these knockouts are no-hassle removable without extra efforts but withstanding the regular installation forces as well .

The knockout can sustain a gradually applied load equivalent to a weight of 4.5 kg, applied at right angles to any point upon its surface by a mandrel with a 6 mm diameter flat end.

### Fixed/Adjustable lug

KSC switch boxes fitted with Fixed and adjustable lugs which are handy-helpful in aligning installed electrical utilities providing right and desired positioning.

The lugs/adjustable lug made within KSC box are tapped for screws M3.5, the adjustable lug is an accessory fixing lug with provision for movement for the purpose of aligning the electrical utility with a minimum torque of 0.4 Nm.

### Quality Control

KSC is proud of our quality assurance, every small particular detail of our products is studied and tested by our in-house and 3rd party labs giving our customers the maximum possible guarantee as usual.

To reach that quality level we are pushing our product to its extreme during everyday and type tests performed as per the international standards.

## PRODUCT DATA SHEET

Product : Junction Box-Metallic	Date: 7/8/2023
Manufacturer : Kherejji Showrooms Co.	Document No.: FB/TDS-08

### Product Features:

Junction Boxes-Metal are used as Electrical Enclosures in the construction industry for general Purpose/indoor commercial use. Junction boxes manufactured by Kherejji Showrooms Company, comply to the customer specification, International Standards as following:

Sr. No.	Part No.	Product Description	Product Sizes (mm)			
			Width	Length	Depth	Thickness
1	GAB/8X8X8-B-MG	Junction Box	200	200	200	1.2
			Knockout Holes Diameter (mm.)			
				Ø26.5	Ø32.5	

### Material:

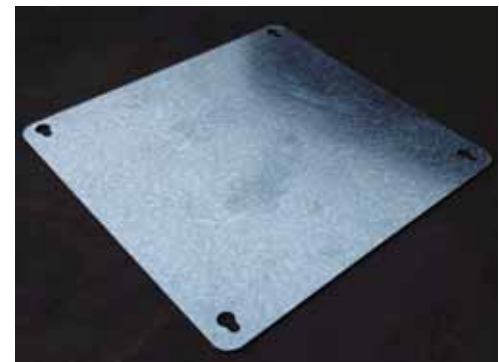

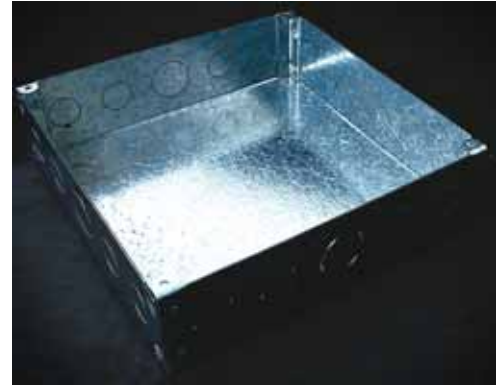

- Mill Galvanized Steel sheet in conformance to ASTM-A653/A653M Standard (Galvannealed by Hot-Dip process)

### Zinc-Galvanized Coating Grade :

- Z275 / G90

### Standards:

- NEMA Type 1
- ASTM A653 / A653M
